Every Child is an Artist.

weeWHAT IS PUFFY &

Puffy is a yarn with ready loops.

What is a loop?

In customary knitting; we form gentle loops with yarn using needles.

We call such knots as "loop". However, for working with PUFFY yarn, we use only our FINGERS.

PUFFY yarn ball

This is the look of Puffy yarn, and we call these circular forms as loop.

NOTE: PUFFY FINE LOOPS are smaller then PUFFY loops.

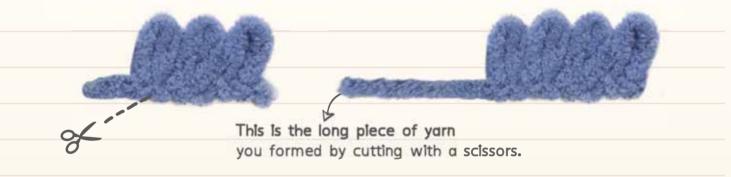

How to work with PUFFY?

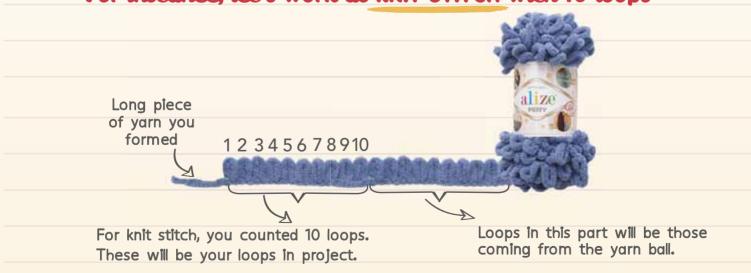

There are many activities explaining it in the book. If we elaborate the terms used therein;

To obtain a piece of long yarn;

We need to undo the first loop when starting to work with Puffy yarn. To do so, you must place a scissors in the loop and cut the yarn to obtain a long place of yarn as shown in the picture.

For instance, let's work as KNIT STITCH with 10 loops

Watch the videos of Puffy patterns by scanning the QR code.

In this book, you can learn KNIT STITCH and TWIST STITCH.

To make a Knit Stitch;

You must couple your loops coming from ball with the ones in the project from back toward front.

In a project of 10 loops; you must pass 11th loop through 10th loop from back to front, and couple all other loops in the similar way to continue working.

We do not turn the piece back and forth when working!

You must work <u>leftward</u> when the loops from the ball are on the

right hand side.

To make a Twist Stitch;

Twist the loops to right or left to match them

NOTE: if you would like,
twist it to
right, also. Which
direction you twist it is
important so that you
must do the same all
along the project length.

For instance, let's make a twist stitch with 7 loops. Turn the 7th loop leftward and pass the 8th loop through the 7th one from back toward front.

Complete the row working the other loops in the same way.

You've already completed the 1st row. For the 2nd row, since your loops from ball are on the left-hand side, continue working by coupling loops from left toward right.

Now, on the 3rd row, your loop from ball is on the right-hand side, match loops from right toward left. Continue working in this way.

How to increase?

We increase for enlarging the project width. When increasing, pass and pull upward 2 loops from ball together through the loop.

Take 2 loops coming from ball.

Pass it through the single loop with which increment will be performed.

How to decrease?

We decrease for lessening the project width. Making a decrease, in other words, making 2 loops into 1 loop. When decreasing, hold two loops in the project together as shown, and pass the loop from ball through these 2 loops.

Pass the loop coming from ball through two loops with which decrement will be performed...

pull them upward. This makes a decrease as seen.

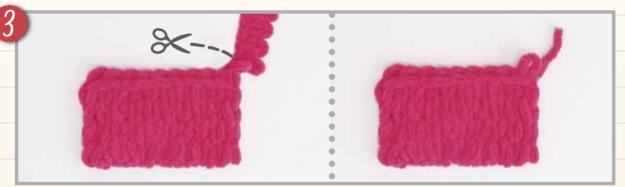

How do Bind off?

To start binding off, pass the 2nd loop through the first one and pull it up as shown.

Pass all the loops through each other one after another.

After binding off all loops, undo the first loop from ball using a scissors, and cut the yarn whereat the scissors is in the picture.

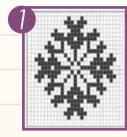

Pass the long piece of yarn though the last loop and pull it upward.

Pass and hide the remaining end of yarn through the project.

How to work with PUFFY MORE?

If pattern work is to be done, the template of that pattern is prepared or downloaded from the web. For example, this is for snowflake template;

The loop is separated as much as the width of the project.

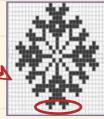

In order to keep the lower part of the project properly, the loops on both sides are first bind off by passing them through each other as in the image (like pulling a chain).

The loops coming from the ball are passed through front loop of the loops that are bound off one by one as in the image. In the 2nd row, you can start creating the snowflake template.

According to the template, the other color of the loop coming from the ball is taken and knitted.

According to the pattern, a pattern is created on one side and at the end of knitting, the loops on the upper row are passed through each other and bound off.

It's time to bind off the loops at the back.

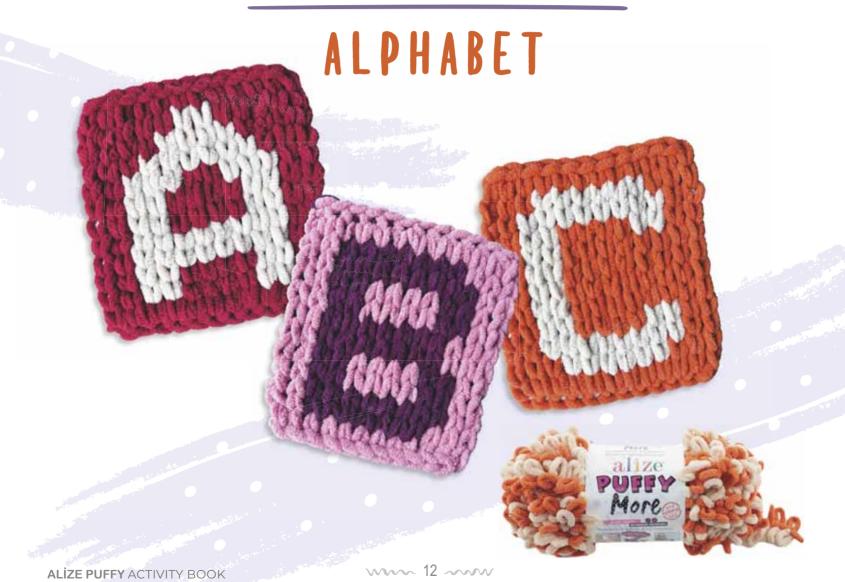

To bind off the loops on the back side, the first loop is passed through the front loop of the bound loop while starting as in the image. Other loops are also bound off by passing them through each other from bottom to top.

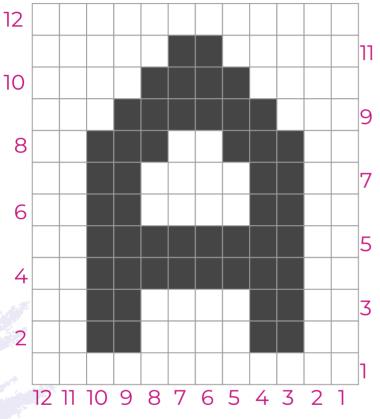

Each color is tied in itself. When tying the loops are brought as close to each other as possible. There is no space in between. Extra yarns can be hided in the project without being cut.

АВ

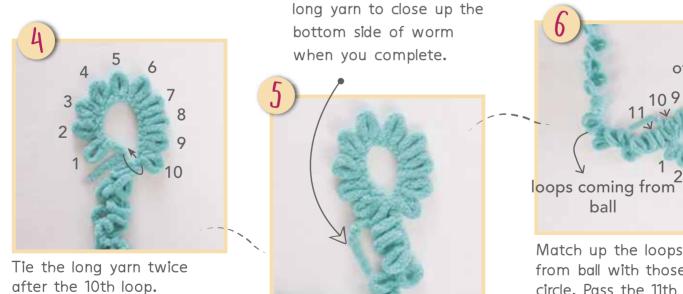

Learning math is fun!

You'll be needing this

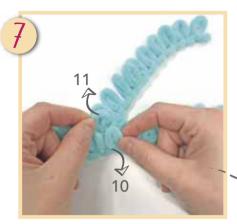

the first loop with scissors.

Now, you have a circle

with 10 loops.

loops

of the circle

Pass 11th loop through 10th loop from back to front.

You matched up all the loops of circle with those coming from ball. So you completed 1 row.

Work 5 more rows in the same way. When you complete 5 rows, obtain a long piece of yarn by opening up the first loop from ball using scissors.

To work the other rows, continue matching up in the same direction.

Cut the long yarn whereat scissors indicates.

Now, tie the pink yarn to turquoise yarn and continue matching up loop in the knitting direction.

Work 5 more rows with pink yarn.

Work 5 rows each with blue, yellow, grey, and red yarns, in order.

It's time
to make the head
of worm. For that,
you need to
decrease loops.

How?

Hold 2 loops together as shown. Pass the first loop coming from ball through these 2 loops you held.

So, you've learned to decrease by passing 1 loop through 2 loops.

Hold the remaining loops in your project in twos to match them up with those coming from ball. Now, you have 5 loops.

After completing 3 rows, obtain a long piece of yarn by opening up the first loop from ball using scissors. Cut off the yarn from the ball.

Hold 5 loops in your project together as shown and pass the long piece of yarn through them.

...and pull the long yarn upward.

You've finished the head part of worm, too. Hide the excess long yarn with in the project.

Cut off and open up 3 loops from the red ball to obtain a long yarn; place it under the worm head as shown and make a knot.

Have long pieces of yarn and make knots with them for making other nodes of worm.

Remember the long piece of yarn at the very beginning? Pass it across as shown.

Continue passing it from left to right, right to left.

When entire opening is closed, pull the yarn upward.

Hide the excess long yarn within the project.

www 21 ~~~~

www 22 ~~~~

ALIZE PUFFY ACTIVITY BOOK

If the yarn at the end is too short, open up the first loop using scissors to have a longer piece of yarn.

Count 14 loops.

Tie the long yarn twice after the 14th loop to have your circle.

Match up the loops coming from ball with those of the circle. Pass the 15th loop through the 14th one from back toward front.

To work with the other rows, continue matching up in the same direction.

Work 11 more rows in the same way. You've finished the body part. Now, it's time for making its head. For that, you need to decrease your loops.

HOW

Hold 2 loops together as shown. Pass the first loop coming from ball through these 2 loops you held, and pull it upward. Hold the other loops in twos to match them up with those coming from ball. Now, you have 7 loops.

Now, work 1 rows with these 7 loops.

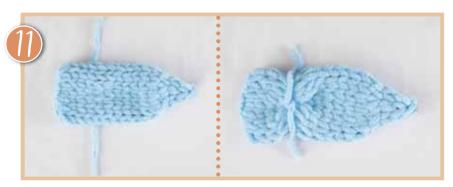

You need to decrease your loops to 3 in the next row. To do so, hold the loops in twos and match them up with those coming from ball. Hold the last 3 loops together and match them up with those coming from ball.

Hold 3 loops together as shown and pass the long piece of yarn through them.

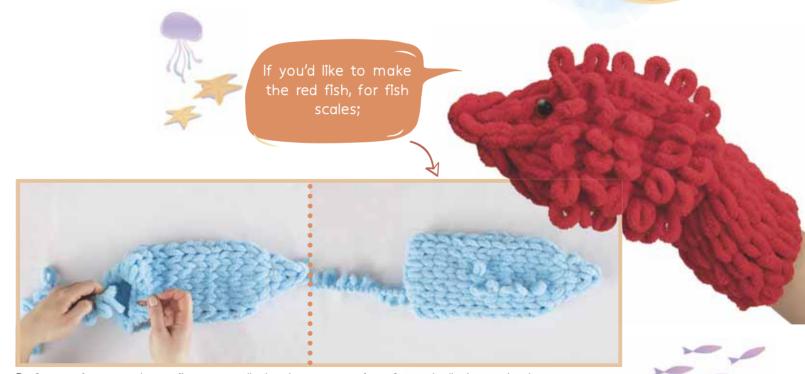

Obtain a long using scissors. Cut the ball.

For working the tail of fish, cut off and open up 3 loops from working yarn to obtain a long yarn; place it under the fish and make a knot as shown.

Place eyes on the head to complete the fish.

Before tying up the tail part, pull the loops coming from ball through the body part as shown.

If the yarn at the end is too short, open up the first loop using scissors to have a longer piece of yarn.

Count 8 loops.

Tie the long yarn twice after the 8th loop to have your circle.

Match up the the loops coming from ball with those of the circle. Pass the 9th loop through the 8th one from back toward front. Continue working by matching up the other loops in the circle with those coming from ball.

NOTE:

To work with the other rows, continue matching up in the same direction.

Work 5 more rows in the same way. You've finished the head part of octopus. Now, it's time for making its tentacles. Each one of 8 loops will be one tentacle.

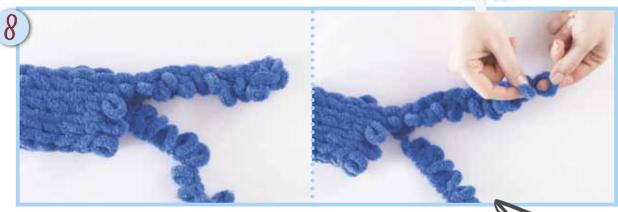

Pass the loop coming from ball through the first loop. Repeat this procedure 10 times as shown. (As if making chains.)

You've almost completed the 1st tentacle. For starting the 2nd one, you need to reach to the loops of the head of octopus, here.

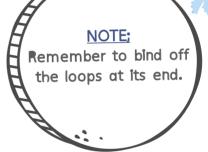

Come to the head part by passing the loops coming from ball one by one, as shown, at the side of the chain you completed.

Now, bind off these loops at side by passing them through each other as show.

Pass the next loop of octopus through the last bound-off loop and start making the 2nd tentacle.

ALIZE PUFFY ACTIVITY BOOK

Work the loops coming from ball by making chains on each loop for 10 times over the next chain as done in the 1st tentacle.

Afterward, bring the loops to the head of octopus at side and start working another

Work all 8 tentacles in the same way. When the last tentacle is finished, obtain a long piece of yarn by opening up the first loop from ball using scissors. Cut off the yarn from the ball. Pass the long yarn through the last loop and tie it around the octopus head.

To close up the top of octopus, use the long piece of yarn you left at the very beginning. Use this yarn to close up the opening by crossing it back and forth as shown.

FOR INSPIRATION...

Textures and pattern of the toys
herein are different. If you want to work this
texture with Puffy, you can scan the QR code
to watch the video.

SCARF AND HAT

Do you want to make a scarf and a hat for your friend?

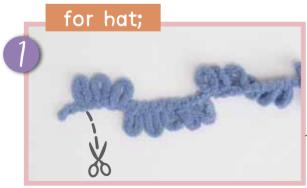

First of all; find out how many loops you need by measuring up the <u>head</u> <u>circumference of the person you will</u> <u>work the hat for with Puffy.</u>

We need 26 loops for making this hat. This can be different according to your measurement.

Start working hat at its top, right here

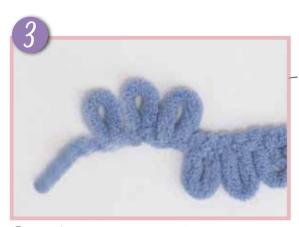

For start, if the yarn at the end is short, open up the first loop with scissors as shown in the picture.

Now, you have a longer piece of yarn.

Count loops.

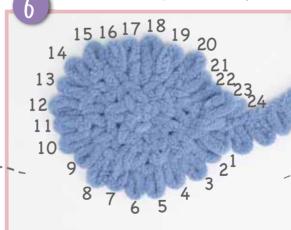

Tie the long yarn after the 3rd loop to form a circle. Pass the 4th and 5th loops through the 3rd loop. Pass the 6th and 7th loops through the 2nd loop. Pass the 8th and 9th loops through the 1st loop. Now, you have 6 loops after passing loops in twos through 3 loops each.

Thus, you've completed the 2nd row.

NOTE: To work the other rows, continue matching up in the same direction.

For the 3rd row, increase 6 loops to 12 loops by passing loops in twos through each loop.

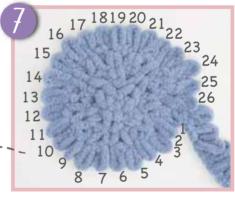

For the 4th row, increase 12 loops to 24 loops by passing loops in twos through each loop.

REMEMBERI

How many loops you found out when measuring the head circumference for hat? Do you think 24 loops enough for you? For instance, we found out 26 loops in measurement.

For that:

Pass 2 loops coming from ball together through the next loop to have 26 loops, or reach to the number of loops you need by repeating this procedure.

When you reached to the number of loops you want, match up each loop in your project with the loops coming from the ball, in order. NOTE: You may decrease or increase the number of loops depending on the hat circumference you want.

Work 7 rows in this way. Since these 7 rows determine the hat length, it varies depending on your number of loops and the person you make for. Now it's time to bind off.

loops coming from working yarn

Pass the 2nd loop through the 1st loop. And then, pass the 3rd loop through the 2nd loop. Bind off all the loops by passing them through each other.

Open up the first loop from the ball to have a long piece of yarn, and cut it off at the bottom of the next loop. Pass the long yarn through the last loop as shown in the picture.

Count 8 loops and match up the the loops coming from ball with the ones you count.

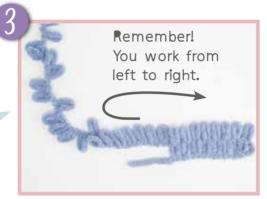

Pass the 9th loop through the 8th one from back to front as shown.

NOTE:

Since the loop coming from ball is on left, continue working by matching up the loops from left to right.

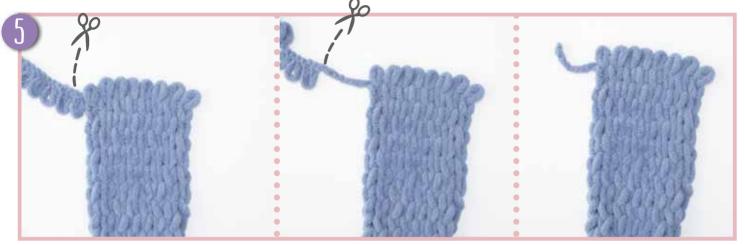

Match the remaining loops in the same way and complete the row.

Continue working until reaching to the length you want.

When the scarf is at the length you want, open up the loop coming from ball with scissors to obtain a long yarn, and cut the yarn off the ball.

REMEMBER !

You must start binding loops off at the opposite direction of the long yarn.

To bind off the loops; pass the 2nd loop through the 1st loop.

Pass the 3rd loop through the 2nd loop, and bind off the loops passing them through each other, in order.

www 40 ~~~~

ALIZE PUFFY ACTIVITY BOOK

Pass the long yarn through the last loop, and advance the remaining yarn to finish your scarf.

Row 2: 7A, 1B, 4A, 1B, 12A

Row 1: 25A

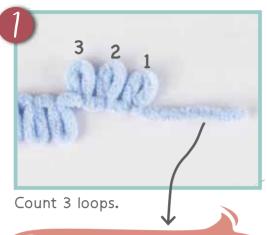

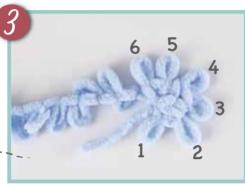

Remember!

If you don't have a long yarn at the beginning, you must have it by opening up a loop. You'll be needing it for tying when making a circle.

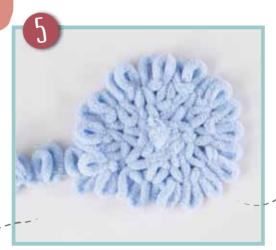

Tie the long yarn after the 3rd loop to form a circle.

Pass the loops coming from ball in tows through each loop of the circle. This will increase 3 loops to 6 loops. Now, you've learned how to make increases with Puffy Fine.

On the 3rd row, pass 2 loops through each loop to increase to 12 loops.

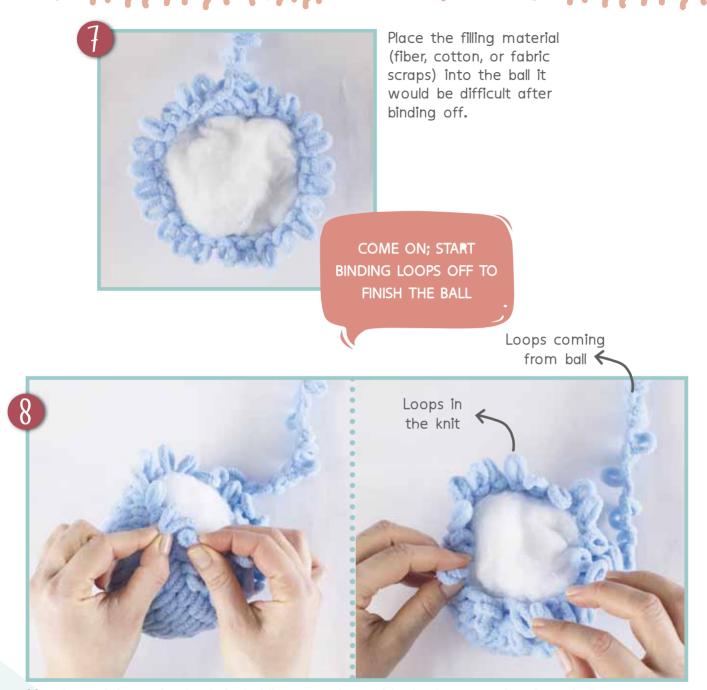

Increase loops on the 4th row; pass 2 loops through each loop to have 24 loops on the circle.

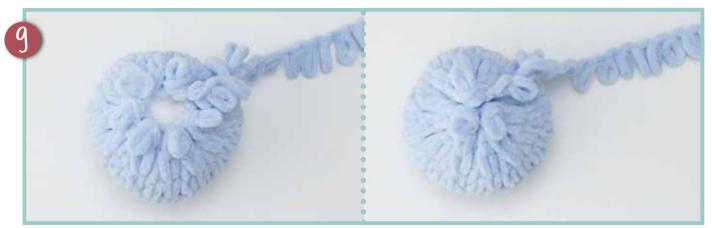

On the rows 5, 6, and 7 (i.e., for 3 rows), work by matching up each loop with each loop coming from ball.

Work as knit stitch without increasing.

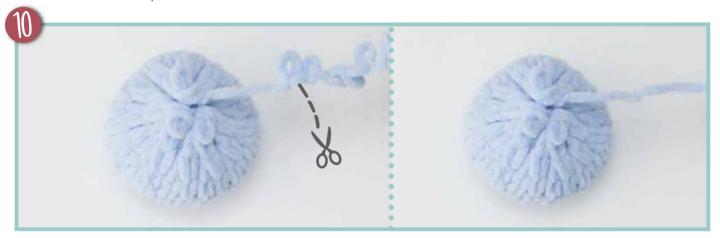

ALIZE PUFFY ACTIVITY BOOK

Match up 2 loops in the knit, holding together, with the loop coming from ball as shown. All the loops like this...

...match up all the loops in the project, holding them together, with the loops coming from ball until 3 loops remain

Obtain a long piece of yarn by opening up the first two loops from ball using scissors. You'll need this long yarn to tie those 3 loop.

Cut off the long yarn.

Hold 3 loops together as shown and pass the long piece of yarn through these 3 loops.

Hide the remaining long yarn before starting to play your ball.

Are you ready to set up your own game?

roof

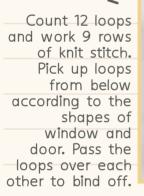

Count 12 loops and work 1 row. On the 3rd row, holding the loops at the beginning and at the end together, match them up with the loop coming from ball, and on the next row, bind off the loops.

tree leaves

For the top part of tree, count 7 loops and work 4 rows of knit stitch. On the 5th row, holding the loops at the beginning and at the end together, match them up with the loop coming from ball. On the 6th row, work all the loops as knit. (So that you have 5 loops). On the 7th row, decrease the loops at the beginning (to left with 3 loops). On the 8th row, pass 3 loops through each other to

house body

tree trunk

Count 3 loops and work 7 rows of cable stitch to form the tree trunk.

bind them off.

pool

For pool, count 10 loops and work 4 rows of knit stitch.

If you'd like, you can sew these on a blanket.

Every Child is an Artist.

Children's imagination and creativeness develop with Puffy!

Puffy is the patented yarn that **Alize** presents to the entire world. When being acquainted with Puffy, it's obvious that it is not just a yarn.

Due to its composition of ready loops, it's worked only by hand without using needles or hooks. Versatile projects are created by passing its loops through each other.

Furthermore, it's suitable for all ages and risk-free.

Children may both imagine and produce what they imagine by means of this book.

Besides making their own scarves and hats, they'll experience the happiness of giving them to their loved ones as gift.

Puffy will make learning a fun time for children while helping development of their fine motor and learning skills. It will enrich your planning and ordering skills, and help creative and flexible thinking as well as developing hand skills.

Kids will have good and productive time with their loved ones at home, on road, and even on holiday. Young designers will create marvelous works with

Alize Puffy, and you'll be surprised with them!
